

Butler Mobility Dumbwaiters

Butler Mobility Products has been manufacturing its dumbwaiters in Pennsylvania since 1956! We are pleased to announce our newly re-engineered line of premium quality electric dumbwaiters.

We provide residential, commercial and restaurant dumbwaiters in 8 standard sizes. Plus custom dumbwaiters in almost any size or shape. We make custom dumbwaiter cars that open on one, two three, or even 4 sides! And corner dumbwaiters, too.

Inclined Platform Wheelchair Lifts

The Butler Mobility Inclined Platform Wheelchair Lift (IPL) is the perfect solution for a home with stairs where someone cannot transfer to a chair lift or needs to have a wheelchair on both levels of their home.

Businesses, schools and churches can provide wheelchair access. Public and corporate buildings can have a safe and reliable solution. Our lifts meet or exceed all National Safety Code (ANSI/ASME code) requirements and have UL® and CSA certified components.

Vertical Platform Wheelchair Lifts

The Butler Mobility Vertical Platform Wheelchair Lift (VPL) is the perfect solution for applications that need wheelchair access, but where stairs are not present. Butler VPLs are often the most cost effective solution for a residence or public or corporate building looking to comply with The Americans with Disabilities Act (ADA).

Courtroom/Rostrum Wheelchair Lifts

The Butler Mobility Courtroom/Rostrum Wheelchair Lift (CRL) is a vertical platform lift specifically designed to be unobtrusively installed within millwork. It provides mobility-impaired people discrete access to a courtroom, auditorium or church and it fits nicely into the décor.
